<b>Description</b>	Similar to a slotted nut with the following exception: the slots are cut into a cylindrical portion that is equal in length to the slot depth and slightly smaller in diameter than the hex width.
<b>Applications/ Advantages</b>	The slots are for the insertion of a cotter pin to secure the nut when used with a drilled shank fastener. The slotted and castle styles are both interchangeable with the slotted design now the preferred style.
<b>Material</b>	Nuts shall be made from a low-carbon steel which conforms to the following chemical composition requirements-- <b>Carbon:</b> 0.47% max.; <b>Phosphorus:</b> 0.12% max.; <b>Sulfur:</b> 0.23% max..
<b>Hardness</b>	Rockwell C32 maximum
<b>Plating</b>	See Appendix-A for plating information.
